

CREATE A SECOND INCOME WITH A SMALL HOME BUSINESS

HOW TO BEAT INFLATION

1. **Inflation will kill your assumed wealth.** Many of us feel that we are getting wealthier each year as our income increases. But truth be told we are actually going backward because inflation normally exceeds our annual increase. To beat inflation your salary should have gone up more than 50% over the last five years.
2. **This is one of the most important reasons for having your own home business (a second income stream).** By having your own home business you can take advantage of some great tax breaks. The startup cost of your new home business should not put you into debt and should not exceed a few thousand rands. There is no other way to get ahead of this unless you are a high-risk investor with bundles of money to invest.

So the small home business is the solution to your financial freedom and creating wealth.

3. **You need to be patient this process will be slow.**

The advantage of a small home business like this is that it will allow you to work part time and work yourself up to R12,000 per month. This monthly income will need to grow at more than 10% per annum so that you can stay ahead of the inflation rate.

4. **South Africa has many small business opportunities; we believe that the current economic climate is right for most entrepreneurs to fly.** You will need to research your business opportunity and market in order to understand all the risks you will be facing. If your startup costs were low then it may not worry you, but the fact is every time you fail it becomes more difficult to start again. This may stop you ever trying again. The key to your success is research, research, research.

The answer is to choose a business that requires a minimal capital investment with the highest possible return.

5. **The most important thing is that you get started on your own business, try not to procrastinate.** With very low risk get started don't wait for everything to be perfect, it never will be.

6. **You need to be committed to which ever business you start**, this is your business do not even start the business if you are not going to put in the time. Decide to be a professional, it may be a home business but could become a very large company if you are serious about change in your life.

By all means, take a look at the thousands of small businesses you can start from home. Then look at the [New Nation Education Company](#) business opportunity and I am sure you will agree that there is nothing else out there that can match this opportunity.
